Wooden Products	Refer to above Standard MOQ and RRP increase	AUD \$1,000	AUD \$9,000	4-6 weeks	100%

Artwork Specs

Different printing and moulding techniques have different technical limitations, so artwork specifications are confirmed once the packaging type and customisation method are selected.

Generally we require high-res .EPS or vector files, PMS or CMYK values of colours and an idea of placement. Our inhouse design team can assist you with designs.

PakMax will provide product-specific artwork guidelines, which may include templates, colour requirements, placement areas, and file format specifications. Final artwork must be approved before production begins.

For artwork specifications or assistance, please contact your Account Manager, who can guide you through the requirements for your specific custom product.
